

**BeeHex**  
Automation

**MEET THE 3DL**  
(High Throughput Decoration Line)

## High Volume Cookie Decoration

The 3DL is built for high throughput decorated cookie production. With 12 extruders per chamber, decorating simultaneously, your cookie decorating process will be fully automated.

### Ideal For:

High volume industrial cookie decoration

Companies who want to automate hand decoration for high volume designs

### Key Features:

- 12 extruders simultaneously decorating
- Only 2-4 people needed to operate the machine, depending on speed setting
- Combine multiple machines in a line to produce multi-color designs
- Clean-in-Place system
- Create new designs with user friendly design software
